

PRESS RELEASE: 21 Sep 2025

# Teknobuilt and PDO Partnership PACE in to a New Era of Digital Project Execution

Muscat, Oman — At COMEX 2025 (8-11 Sep'25), Petroleum Development Oman (PDO) proudly formalized its strategic partnership with Teknobuilt marking a significant step forward in shaping the digital future of Oman's energy sector. The signing ceremony, hosted at the region's premier technology show, underscores a shared commitment to innovation, efficiency, and sustainability in project execution.

PDO, Oman's leading exploration and production company, is widely recognized for its forward-looking strategy and adoption of cutting-edge digital solutions. By partnering with Teknobuilt, PDO reaffirms its confidence in Teknobuilt's ability to deliver measurable impact in project delivery and operational transformation. Teknobuilt is honored to be among the select group of global innovators chosen by PDO at COMEX 2025 to help accelerate Oman's journey toward a smarter, safer, and greener energy ecosystem.

## Driving Oman's Digital Future with Adaa, Powered by PACE OS

At the core of this partnership is **Adaa**, the Digital Construction Program powered by Teknobuilt's **PACE OS** platform. Adaa was built to close the gap between vision and execution by bringing planning, governance, and field operations into a single, connected system.

With AI-driven block scheduling, Digital Advanced Work Packaging (AWP), and real-time site visibility, Adaa provides decision-makers and field teams with one single source of truth. The platform is being progressively deployed across PDO's projects, and obtain significant outcomes:

- **Shorter project timelines:** Intelligent workflows accelerate delivery and bring assets online faster.
- **Lower project costs:** Streamlined processes and integration reduce inefficiencies and maximize value.
- **Greater productivity in the field:** Frontline teams are empowered to spend more time on productive tasks and less on waiting or rework.

**Yahya Balushi, Head of IM&T Portfolio & Innovation** (PDO) sees these achievements highlight how technology, combined with strong governance and a culture of collaboration, is setting new standards for capital project delivery in the region.

## A Partnership Built on Innovation and Trust

The Teknobuilt–PDO story is rooted in trust, innovation, and shared ambition. Together, both organizations are showing that digital construction is not just a future vision — it is already beginning to reshape how projects are planned and executed today.

“Digital Construction is powering the future of execution. With PDO, we are not just delivering projects — we are building a sustainable digital legacy for Oman's future”, said **Yogesh Srivastava, CEO of Teknobuilt**. PACE OS provides a multi-stage, digitally unified operating environment from concept to commissioning. **Abhishek Srivastava**, president and co-founder adds that the unmatched value to PDO is when the sum is greater than parts powered by the AI core of DC Block technology that containerizes constantly evolving data sets and instantaneously enabling multi-dimensional views.

## Look Ahead

The formalized partnership paves the way for expanded collaboration across **smart infrastructure, renewable energy, data-driven governance, and sustainability initiatives**. It aligns directly with **Oman Vision 2040**, ensuring the nation's ambitious goals for growth and digital transformation are supported by world-class execution systems.

For global partners, clients, and investors, this milestone is further proof that Teknobuilt is a trusted partner for complex, high-impact initiatives — delivering execution certainty, measurable sustainability, and long-term value creation.

## About Teknobuilt

Teknobuilt is a global technology company transforming energy, infrastructure, and construction projects through its AI and ML powered PACE OS platform. By delivering proactive insights, automation, and operational certainty, Teknobuilt enables smarter, safer, and greener project execution worldwide. (<https://www.teknobuilt.com>)

## About Petroleum Development Oman (PDO)

Petroleum Development Oman (PDO) is the leading exploration and production company in the Sultanate of Oman, pioneering innovation and sustainability to drive the nation's energy future. (<https://www.pdo.co.om>)
